FRIDAY, APRIL 30, - SATURDAY, MAY 1

Here it is!

"BEHIND THE FRONT"

The sunny side of the war

The best laugh in years
A big special—shown at regular prices
Grand dance after show, Saturday night

MONDAY-TUESDAY, MAY 3-4

THOMAS MEIGHAN in

'THE NEW KLONDIKE'

supported by Lila Lee and strong cast.

An excellent comedy drama, in which you will see your old favorite at his best.

—Coming—

Colleen Moore, Saturday only, May 8.

Council Will Establish Auto Camp

The council are going ahead with a plan to establish an auto camp in Oyen, and will use the site of the skating rink for same. This is a good move. The proposition has been discussed quite often in the past but it has remained for the present council to take action in the matter. To the tourist traveling between Saskatoon and Calgary, Oyen makes a desirable point to stop at, being half-way between the two cities. The site chosen appears to be very suitable, and with plans shown on four nights in the week, tourists will be afforded an opportunity for evening entertainment.

Canada's Greatest Asset and Greatest Problem

Rev. George A. Dickson, of Knox Church, Calgary, will be an Oyen visitor on Friday, May 7, when, under the auspices of Oyen Lodge No. 104, A.E. and A.M., he will deliver a public lecture in Oyen Theatre, commencing at 8 p.m.

The subject Rev. Dickson has chosen is "Canada's Greatest Asset and Greatest Problem", and should prove of interest to all. What is our greatest asset? Our Youth! For the development of the asset, true understanding of the problem is essential. And our youth present us with our greatest problem, in the solving of which, with its many phases and difficulties, must lie the ultimate development or failure of our greatest national asset.

This lecture has been aptly described as a feast of wit and wisdom.

The speaker is too well known to make comment necessary. You should hear him on Friday, May 7.

Siding Named For War Hero

The siding at mileage 49.0 on the Boughess Willowbunch branch of the Canadian National Railways, has been changed from Harvester to Roncott. The new name is a contraction of the man Ronald Prescott, who homesteaded the quarter section on which the siding is constructed and who lost his life in the great war.

WEDDING

Jensen—Scherling

The marriage of Nanny Maria, daughter of Mr. and Mrs. E. Scherling of Raley River, Ont., and Crist Wolfgant Jensen, was quietly solemnized at the United Church parsonage, by Rev. C. R. Corcoran, on Saturday, April 17. Mr. Jensen is farming the Russell Taggart place south-west of town.

Grain Exports Show Increase

Closing figures for grain exports to March 31 issued by the Vancouver Merchants Exchange show the total amount shipped for the present grain crop year to that date.

United Kingdom and continent, 24,083,222 bushels, Orient, 18,160,306, South America, 613,880, New Zealand, 73,424 bushels. Total 43,530,832 bushels. The 1925 shipments for the

Provincial Corn Show at Medicine Hat

The provincial Corn Show for Alberta is to be held this year at Medicine Hat under the auspices of the Alberta Corn Growers' Association of which organization Don. H. Bark of Brooks is President and James Murray of Medicine Hat is Secretary. The directors are working out a prize list which will include classes for the following types of corn—yellow and white flints, yellow and white dents, Northwestern Dent, sweet corn and popcorn. There will also be classes for sheaves. In addition to such prizes the Directors hope to be able to secure several trophies as championship awards.

A special trophy has already been offered the association for the children's classes by F. G. Giesbert, Esq., of the Garbutt Business Colleges. There will be two classes for boys and girls under sixteen, one for yellow flints and one for white flints. Boys and girls who would like to compete at the show next November and who have not decided for planting should write to the secretary at Medicine Hat. He has a limited amount of good seed and for twenty-five cents will send sufficient to plant a good sized lot.

Test Cases on Oil Stock Selling

To test the power of the provincial public utilities board to control oil stock selling by companies with dominion charters, two test cases have been taken against oil companies in Alberta by the Attorney General's Department, on the basis that stock selling was undertaken without first securing permission of the utilities board.

Increase in Auto Licenses

It is expected that nearly 60,000 auto licenses will be granted in the province this year. Provision has been made for issuing at least 57,000. This will be the largest year yet recorded, it is estimated.

Tourist Roads Open

The Banff-Windermere highway via Lake Louise will open for traffic May 24. The Alberta end of the highway, from Calgary to the Banff Park, is in excellent shape, having been open all winter for traffic. This was one of the first gravelled highways to be completed by the province, and has already seen considerable traffic this year. The indications are for a very heavy tourist traffic over this road this season.

Grain For Italy

The largest shipment of grain made from the grain elevator at Halifax and the first ever to be made from that port to Italy, left recently on the steamer Afghanistan, which carried 308,000 bushels for an Italian port.

same period were 19,476,904 bushels, so the present year's increase is over 24,000,000 bushels. The banner year of 1924, to same date, gave a total of 30,320,112, or over 7,000,000 bushels less than the record total reached this year.

J. J. Purcell General Merchant

MANITOBA POOL REJECTS OFFER OF GRAIN GROWERS

Winnipeg.—Following the announcement that the Manitoba Wheat Pool had declined an offer made by the United Grain Growers for a working agreement in respect to elevator owned by the two organizations, T. A. Cress, president of the United Grain Growers, issued the following statement with respect to the offer by the company:

"Our suggestions are merely carrying out the policies laid down by the delegates at the annual meeting of the company last November. They would give the pool control of pool grain and at the same time preserve the competition of the farmers' organizations and the distribution of farm supplies such as is now carried on through our elevators."

"It is true that our offer was promptly rejected by the Manitoba pool board. We believe, however, that a careful study of the plan suggested will reveal that it is not so much a great deal of merit. The reason for rejection was that amalgamation between the pool and the company is undesirable, but our suggestions involve nothing like amalgamation. They simply provide a plan for joint use and control of elevator facilities already owned by farmers for the handling of both pool and non-pool grain."

"The pool, it was announced, has decided that 'in our opinion the United Grain Growers Limited and the Manitoba Wheat Pool represent two systems of grain marketing which are essentially different as to render amalgamation impossible.'"

Ask Embargo Again On Canadian Cattle

House of Lords Discusses Discontinuing Shipments From October 1 to March

London.—Stressing the case of the Manchester Producer, as an argument in favor of an embargo on Canadian cattle, Lords Bamber and Lamberton urged the re-imposition of the embargo, at least from October 1 to March, in the House of Lords.

The Manchester Producer was victorious in mid-October when he won from Halifax to Manchester and the cattle on board suffered greatly during the storm which struck the vessel.

Replying, Lord Bledisloe, under-secretary of state for agriculture, stated that the ministry of agriculture was prepared to take all reasonable precautions to prevent a recurrence of the Manchester Producer disaster.

Ponzi Again Sentenced

Jacksonville, Fla.—Charles Ponzi, financial wizard, was sentenced to serve one year at hard labor in the state penitentiary at Raiford by Judge James M. Peeler in Criminal Court. He was convicted under a charge of violating the Florida law relating to the conduct of business under the name of trust, which Judge Peeler granted Ponzi's motion for a new trial. Ponzi, who is now engaged in conducting a land syndicate, was given 60 days in which to present an appeal.

Goes to Jail for Rum Running

Portland, Ore.—Captain Robert Campbell, of the Canadian schooner Persawia, which was seized as a rum runner off the Washington coast in February, was sentenced in federal court to two years in penitentiary and fined \$5,000. Jacob Wollette, who was convicted along with Captain Campbell, was sentenced to two years and fined \$10,000.

Veteran C.P.R. Operator Dead

Ottawa.—David Robertson, aged 56, who finished the first message across the Canadian Pacific Railway Company's coast-to-coast telegraph when it was originally constructed, died of pneumonia at his home in Vancouver. For a number of years he was chief operator for the C.P.R. here.

Spitzbergen Ready For Norge

Lensgaard.—Lieutenant Riser-Larsen, of the Amundsen-Sydney Polar expedition, received a message from Capt. Amundsen, at Spitzbergen, saying all preparations have been finished for resuming the driftlight Norge, in which it is hoped to fly over the Pole.

Veterans Will Meet in Victoria

Victoria, B.C.—This year's Dominion convention of the Army and Navy Veterans Association will be held here September 11. It has been postponed from the Victoria branch. This will be a week earlier than first planned.

W. N. U. 1325

Favors Limitation Of Armaments

U. S. Would Welcome Completion of Work of 1921 Conference Says

New York.—United States policies on outstanding international issues were asserted by Frank B. Kellogg, secretary of state, in an address at the annual luncheon of the Associated Press.

On the question of armament limitation, the secretary said the United States Government would "welcome an agreement which would complete the work begun in Washington" at the 1921 conference.

Secretary Kellogg pledged in this connection that the delegates from the United States to the preliminary armament conference in Geneva would "use their influence in favor of proposals which may be practical in their application and realistic in their development."

He reminded the audience, particularly the "Herald Tribune" and "The New York Times," that the delegates to the Associated Press, that the true policy of this country contained "no desire for imperialistic acquisition of territory, political or economic domination."

Protests Against Delay In Inquiry

D. F. Kellner Wants Earlier Probe In

Edmonton.—Mr. Justice Deek will not hold an inquiry before next September date alleged corrupt practices in the federal election of Albertans during the last Dominion election, so he is expected to have informed a delegation of United Farmers of Alberta that waited upon him recently.

This was the information given to delegates who were present at the meeting in the city council chamber by a provincial U.F.A. association for the return of the delegation, which was composed of C. Durnell, C. Drummond and H. Goshard.

A strong protest against this delay was voiced by D. F. Kellner, Edmonton Progressive candidate for mayor, who stated that many of the witnesses will be out of the country if the probe is not held before the end of the year.

He has indicated, steps will be taken to bring the matter before the House of Commons.

Suggests Amendment Of Naturalization Act

Miss MacPhail Would Have Canadian Girl Marrying Aliens Retain British Citizenship

Ottawa.—Miss Agnes MacPhail proposes to move in the House of Commons that the Canadian girl who marries an alien and continues to reside in Canada shall not lose her British citizenship by the mere act of marriage.

Miss MacPhail's proposal is that the "Naturalization Act" be amended to provide that a woman of British nationality residing in Canada should not lose or be deemed to lose this by her act of marriage with an alien, but that she should retain her citizenship by the mere act of marriage. She should be allowed to retain her citizenship, although not limited to one, on account of the number, give particular reference to marriages between Canadian girls and Americans.

Willingdon May Be Next Governor-General

Will At Least Receive Offer Canadian Press Informed

London.—The Canadian Press has been authoritatively informed that Viscount Willingdon at least will receive the offer of the Governor-General of Canada.

Lord Willingdon was on his way to China at the time. He was at the head of the Chinese indemnity fund committee which was going to China to arrange for the return by the British Government of the Boxer indemnity amounting to some £11,000,000.

Henry Ford Is a Free Trader

Detroit, Mich.—Henry Ford, Detroit industrial magnate, stated his belief that the industry of Ford City, Ontario, "run better" if there were no tariff whatever. Mr. Ford declared himself to be a free trader. The magnate was interviewed by the Wabikewille ferry as he was returning from an inspection trip of the Ford City plant.

Dangerous Floods In Arabia

London.—A Reuter's dispatch from Cairo, Egypt, reports that a disastrous flood is sweeping through Arabia. A traveler arriving from Yemen said the flood waters, piled up by cloudsburst at Yemen, had killed many people and washed away 700 houses.

British Alarmed By German-Soviet Pact

Believe Berlin Is Being Fooled By Soviet Minister

London.—The British, who had viewed the negotiations for the Rumanian pact with complacency, now are becoming alarmed, not because they distrust the Germans, but because information has come to them which indicates that while the Germans are honest, they possibly are being fooled by Foreign Minister Tschetichin, who is regarded as the cleverest diplomat in Europe.

British diplomats are convinced that Russia is mediating an attack on Rumania, both to obtain the return of Bessarabia, which generally is admitted to be more Russian than Rumanian, and to damp down the discontent at home by what the Kremlin politicians hope will be a victorious foreign war. The Red army is reported to be getting restless and unruly, and the Soviet leaders feel that they must give it an occasion in order to render it innocuous.

Death Penalty To Remain

Move of Labor Party Is Defeated In British House of Commons

London.—The House of Commons in committee rejected by a vote of 121 to 107 the new official Labor clause of the army and air force annual bill, providing for the abolition of the death penalty in cases of cowardice and desertion while on active service.

The house also rejected, by a vote of 253 to 163 the Labor clause which would prohibit the use of troops in connection with trade disputes except when a proclamation declaring that a state of emergency existed was issued.

RESUME WORK OF CONSTRUCTION ON H. B. ROAD

Ottawa.—The fact that parliament has already appropriated one-twelfth of the total estimate of \$2,000,000 for the completion of the Hudson's Bay Railway, has led to a start being made, already, upon the operations.

One-twelfth of the estimate, amounting to \$200,000, and at the present operations, will be required to complete the existing line in shape and for the old construction which will be necessary when H. B. C. A. Dunning was made minister of railways he spoke at Regina and declared that one of his main objectives was the completion of the Hudson's Bay Railway.

An appropriation of three million dollars appears in the estimates this year, and with what has been voted already the minister is in a position to go ahead with fairly extensive operations in anticipation that the work of parliament, the work of planning the existing line in shape and of continuing the construction will be carried forward under the present administration.

There is now no doubt that the whole undertaking will be carried forward to completion and the work of parliament, the work of planning the existing line in shape and of continuing the construction will be carried forward under the present administration.

Lord Allenby Leaves For Home

Lord Edmund Allenby, conqueror of Palestine, accompanied by Lady Allenby, is shown above by Commander E. Lamb, leaving Canada on the Canadian Pacific liner Montrose.

The famous soldier has just completed a tour of Canada during which he was received by the most prominent residents of almost every large city in the Dominion.

The "Fall of the House of Habsburg" and stressing the importance of the capture of Palestine in helping win the Great War.

MAY NOW EXTEND SEARCH LIMIT FOR RUM RUNNERS

Ottawa.—Extension of the limit of search to 20 or 35 miles from the United States shore is mentioned as a possibility in the correspondence between the British ambassador at Washington and the Governor-General of Canada. This correspondence was tabled in the House of Commons in reply to a question concerning seizure of the Canadian schooner Pictonian off Long Island, in October, 1924.

Sir Esme Howard wrote Baron Byng on October 15, 1924, concerning the seizure of the liquor laden schooner. One paragraph of his letter reads:

"It was pointed out by the assistant United States Attorney that the Pictonian was captured 14 miles from the shore on evidence that she was reached by the motor boat K-14621 in less than one hour of the first seizure. In the case of rum runners, the limit of search might be as far out as 35 miles."

The fyle deals with the ownership of the Pictonian rather than with her adventure, but a newspaper clipping which she is now in the possession of the United States Government was ordered on January 26 last by a Judge in Brooklyn, N.Y.

The Pictonian was seized by the United States Government cutter Rescue with 649 cases of liquor aboard and an empty motor boat alongside.

Will Lead Liberals

Joseph T. Shaw of Calgary Chosen Chief of Party in Alberta

Edmonton.—Practically unanimously by a resolution made at the floor of the convention by Ed. F. Ryan, Calgary lawyer, that nomination of a provincial Liberal leader be made null and void, the convention, which was held at the Hotel Macdonald, elected Joseph T. Shaw of Calgary.

The choice was made by executives representing every provincial constituency, and as explained by Hon. W. O. D. Buchanan, who took the chair at the convention, the convention, this form of procedure had been adopted following the system in Saskatchewan when Winchester to Hon. C. A. Dunning was named.

One hundred and twenty-five delegates were present at the convention. At the afternoon session, Joseph T. Shaw, Calgary lawyer, launched an attack upon the former government of Alberta turning it one at a time.

Created A Marquis

London.—A marquisate, in recognition of the completion of his work during his term of office as viceroy of India, was bestowed upon the Earl of Reading by King George. The earl, who is just home from India, went to Windsor to visit the King, the marquisate being bestowed in the course of the audience.

Refuse To Legalize Betting

Bill Introduced in British House of Commons Is Defeated

London.—The House of Commons rejected the bill introduced to legalize betting and license bookmakers, 126 to 94. The rejection of the bill was moved by John Scrymgeour, prohibition member for Dundee.

The question of legalizing betting and putting a tax on it has been under consideration for a long time, and recently it was reported that Winston Churchill, chancellor of the exchequer, casting around for some new source of revenue to aid the budget, had lighted upon betting as the most fruitful possibility for a new tax.

The church people have been strongly opposed to such a measure, as well as several members of the cabinet, some of whom Mr. Churchill was said to have won over to his side.

Details Of Chinese Massacre Revealed

Only Five of Cabinet Office Guard Survived 400 Killed

Shanghai.—Only five men out of 400 comprising the guard of the cabinet office escaped death at the hands of the Kiangsu troops before the evacuated Peking, says The North China Daily News.

The newspaper claims that a cold-blooded massacre of the cabinet office guard was carried out by the Kiangsu troops.

It says the extremists persuaded their commanders to destroy all the members of the cabinet office, which fled on student during a demonstration last month. The men were taken beyond the yellow (empire) and machine guns were opened upon them, only five escaped alive.

Cost Of Completing Hudson Bay Railway

Figures Given to House by Sir Henry Thornton

Ottawa.—The Hudson Bay Railway will cost \$2,000,000 to complete and a further \$1,250,000 to put into operation. This is the opinion of officers of the Canadian National Railway, transmitted through Sir Henry Thornton's office in reply to a question asked by the House of Commons, and tabled in that chamber.

Grading was completed some years ago, but now it requires considerable repairs, was one of the notions on the file.

OPPOSITE VIEWS ARE AIRED IN BUDGET DEBATE

Ottawa.—Continuing the budget debate, Mr. Macdill stated that the year's financial statement was noted for its announcement of a reduction in the trade increase in the Canadian National Railway.

Another feature of the budget which was popular, said Mr. Macdill, was the return to penny postage. Canada was a pioneer in the experiment of penny postage, back in the days when Sir William Mulock was postmaster-general. The experiment had proved very profitable then, and Mr. Macdill thought it very fitting that Canada should go back to the two-cent stamp.

In spite of all the smuggling which was said to be going on, Mr. Macdill drew attention to the fact that there had been a considerable increase in the net sum collected on customs duties, and the returns of the customs department showed a very satisfactory increase.

Mr. Macdill supported the reduction in the tariff on motor cars. The nearer Canadian prices were made to those in the United States the greater would be the prosperity of the automobile industry in this country. This was due to the fact, he stated, that reduction in the price of cars would increase the number sold.

Mr. Macdill expressed the view that the government was being governed by the Progressive group. The speech from the throne had stated that the tariff board would be constituted for the consideration of tariff matters; yet the government had in its budget taken a step in the opposite direction.

Mr. Macdill expressed the view that the government was being governed by the Progressive group. The speech from the throne had stated that the tariff board would be constituted for the consideration of tariff matters; yet the government had in its budget taken a step in the opposite direction.

LABOR CLAUSE IS CHALLENGED IN BRITISH HOUSE

London.—Sir William Joyce, House secretary, in closing the debate in the House of Commons on the clause proposed by the Labor party for prohibiting the use of troops in connection with trade disputes except when a proclamation was issued, declaring that a state of emergency existed, alluded to S. Salata, the Italian communist member for North Batters.

"If the honorable member (Salata) or any other person inside or outside of this house," said the House Secretary, "thinks the time has come to challenge the right of this democratic government to maintain law and order, he will find the government not averse to taking up the challenge."

The house secretary's reference to a challenge was in connection with a speech made by Salata in the house, in which he had alluded to the army and navy were offered by the capitalist class and were used only in the interests of capitalists. "The only way," Salata said, "to break the law, is to break the law."

During the debate, Lord Colonel Sir Alan Duguid, Conservative, proposed a vote of no confidence in the government. He had been elected with a view to undermining the loyalty of the troops.

Heard of the cabinet office, which fled on student during a demonstration last month. The men were taken beyond the yellow (empire) and machine guns were opened upon them, only five escaped alive.

Esquima Accused Of Murder

Edmonton Judge Learning About Jones

Edmonton.—Judge Dabue, who has already had connection with the trial of Esquima, in the case of Jones, is expected to leave for Esquima about June 1 to preside over a hearing resulting from the trial of Esquima.

Esquima, named Esquima, was accused, having been apprehended by the Royal Canadian Mounted Police, of the murder of a man in January, 1925, for the shooting of a native, Ulukak, on Parry Bay in the summer of 1924.

Two lawyers, one for the prosecution and one for the defence, and the judge's personal secretary, also will make the trip.

Canadian Doctor Honored

Montreal.—Dr. H. M. Morrison has been awarded the Hamar Memorial fellowship by the Research Council of Canada. Dr. Morrison is now carrying on research work with Sir Ernest Rutherford in the Cavendish Laboratory at Cambridge. He is a native of British Columbia, and a graduate in medicine from the University of British Columbia.

King Awards Medal

London.—King George has awarded the bronze medal for gallantry for saving life at sea to the chief officer, the second and third officers, the engineer, wireless operator and two Chinese seamen of the steamer Benloof of Leith for the rescue of the crew of the schooner Nancy Lee, of St. John, Nfld., on October 23, 1923.

Will Enter Politics

Mexico City.—All Roman Catholics are urged actively to participate in Mexican politics to control legislative, congressional and municipal elections as an effective means to bring about reforms (freedom) in Mexico. The advice is contained in a pastoral letter signed by all the archbishops and bishops of the country.

Sir Arthur Currie Re-elected

Montreal.—Sir Arthur Currie was re-elected president of The Last Post Fund at the annual meeting here. Possibilities of branches being formed beyond the borders of the Dominion were mentioned in the report of the secretary, Arthur H. D. Blair.

Probe Submarine Disaster

New London, Conn.—With three seamen dead and six others injured, the submarine S-56, a naval board of inquiry was at work here searching for the cause of the explosion which shattered the battery room of the submarine S-56.

Devil's Gate Dam, Near Pasadena, California, Has a 25-foot Concrete Auto Road on the Top

Devil's Gate Dam, near Pasadena, California, has a 25-foot concrete auto road on the top.

Aviation Body Has Ambitious Ideas

Would Increase Speed By Flying At Higher Altitude

Twelve-hour air service between Hamburg and New York, the aim of a new Berlin aviation society investigating flying conditions in higher altitudes, is seen as a problem of interest, but with a solution far from early realization by Dr. Karl Amstutz, flight expert.

Berlin advises say the society, known as "The Society for Investigation of A-lion in High Altitudes," hopes to find a means of flying at an altitude of from six to seven miles. This, they say, would solve the problem of trans-oceanic aviation.

It is pointed out that in the lower atmosphere regions, planes are hampered by vertical squalls, fog, thunder clouds and other atmospheric interference which do not exist in the higher strata. Increased speed, as high, possibly, as 270 miles an hour, would be made possible, they believe.

Professor Richard Schuler, head of the Potsdam observatory, one of the experts of the society, says his findings show a minimum speed of the decrease in air density, the air power to maintain speed has to be doubled.

The fuel consumed in the process is, however, not increased.

For such advantages, Amstutz says, cannot be obtained without sacrifice in other ways.

In the lighter-than-air craft field, he says, Dr. Amstutz and his associates are working, attempts to "raise the ceiling" are being made daily. These could, principally of recovery, lead to water through the burning of fuel as a means of "backstop recovery" to make possible flights at high levels and return to earth without loss of ballast.

Will Preserve Cathedral

Beautiful Spanish Structure 300 Years Old To Be Repaired

The most beautiful church in Spain, the Cathedral of Seville, is to be repaired, says a statement from the city authorities. The cathedral, built by Peter the Great, King Ferdinand the Saint, will fall to pieces unless immediate repairs are made.

The tower, built by Melchor Hans, of Cologne, to which the cathedral owes its picturesque outline and its renown, are in particular need of repairs.

The Spanish government at a cabinet meeting voted a sum of funds necessary to save the historic structure. This action was taken after the press had asked the government to provide the funds to prevent the destruction of the church. The Duke of Alba also called attention to the precarious situation.

Weather and time have done great damage to the towers, and preparations already have been made to repair the structure. The transport also is almost in ruins.

Architectural variations of three centuries, all in harmonious accord, may be seen in the Burgos Cathedral. Melchor Hans contributed the perforated tower-caps and the lantern. It is the only church in Spain in which Norman style has been treated effectively.

The church was not finished until 1567, more than 300 years. Thus a German, an Englishman, and a Spaniard made possible the everlasting beauty of the cathedral.

Increase in Revenue

An increase of nearly \$100,000,000 over the 1925 figure, is the record made by February's total revenue from all branches of industry, as estimated by the Financial Post. The total is \$166,672,120, against a total of \$132,018,400 for February, 1925. The figures include gross revenue from agriculture, forestry, fishing, trapping, mining, electric power developments, building and manufacturing.

Not His Views

A visitor in a certain country village went into a local post office, and with the object of getting into conversation, asked the postmaster what his views were with regard to vegetarianism.

"I haven't any views of that kind," replied the official, innocently, "but we've got some fine potatoes of the new variety, the Bapiste Church and the library."

America has a property loss of approximately \$1,400,000 by fire.

The second greatest copper mine in the world is in Alaska.

W. N. U. 1625

Some Odd Occupations

Dealing in Secondhand Paint Glass and Repairing Wallpaper

The dealer in secondhand paint glass is certainly the possessor of one of the oddest occupations of any man in London. When a big window gets smashed the owner usually prefers that the insurance company shall replace the broken pane than that he should be paid its price. The dealer buys the broken pane from the painter and rats them out, finding ready sale for the smaller sheets.

At least one man makes a fairish income as a wallpaper repairer. When a good paper gets spotted or splashed with ink and it seems as if the whole room must be repapered. But the repairer simply pastes a piece of white paper over the rest of the damage; the pattern so exactly that no one can tell where old begins and new ends.

The water diver is known in England, but not the water trawler. In Paris there lives a certain M. Davillon, who spends his days trawling water. So delicate is his palate that he can tell at once from what part of France, about from what spring, the water has come. Also he can say when minerals are present and, roughly, in what quantities.

Boatmen Lose Alarm Clock

Famous Whistling Record of New

Boatmen's Whistling Record of New Rochelle's famous whistling record, which has served as an alarm clock for boatmen living near the city, has been broken. The record was set by a boatman who whistled for 12 hours and 15 minutes.

Curious farmers and boatmen of the vicinity gathered at the scene of death and cut off the dead rooster's head. They found a very small white bird, which in the end of the day had been found by a farmer.

Death had been caused by a snake becoming lodged in the flask and choking the bird. For years the bird, which was a white whistling, had been a favorite of the whistling and flapping of wings.

No one suspected the cause and Adam turned a deaf ear to the whistling of the bird, carefully treasured it.

Changes In Royal Household

Daughter and Companion of Late Queen Mother Starting Own Home

Princess Victoria, whose illness has recently aroused anxiety, is to be the first time setting up house for herself. She was the favorite companion of her mother, especially after the death of King Edward in 1910, and was in a sense left "homeless" when Queen Alexandra passed away.

She has taken a house in the old-world village of Iwer, where she intends to live a quiet country life. Miss Charlotte Knolly, who for 25 years was secretary and daily companion to Queen Alexandra, is also starting her own home at the age of 69. She has lived all her life in the royal household, but is now going into a London flat.

Was Careful About Terms

Boxing Champion Though Exasperated Had Eye to Business

Even in moments of extreme temperance a certain boxing champion has an eye to business.

When on his way to the west and with his trainer, a passenger leaving the train took on his foot and thrust him aside with a sharp elbow. "I wouldn't stand that sort of thing, Harry," said the indignant trainer.

"I don't intend to," replied the boxer, catching the offender by the collar. "Look here, my good man, for two pence and sixty per cent. of the purse, win, lose or tie, the winning referee, I'll knock your head off."

Petrified Forest Found

Near Marquette, Texas, geologists have found a petrified forest in a remote valley of the Big Bend country in that state. Petrified trees with trunks of 150 feet were found still standing. One of the fallen trees was of unimagined size, being 396 feet long. The valley in which the forest was found is split by a deep canyon and the land is covered with volcanic ash.

Trains Wolf To Guard Car

The latest thing in safety devices for parked automobiles goes to Frank Doudner, big game hunter, of Brookline. On a recent trip to Northern Quebec, Doudner carried a huge black wolf, and he says he will train it to act as watchdog for his car.

London Has Aeroplane Club

By the many clubs in London is added one for owners of private aircraft. The club starts with twelve members who possess aeroplanes of their own, and it is intended that the contests will be promoted and prizes offered.

Made Fortunes But Died Poor

Vast Holdings of Soudroughs of '98 Trail Practically Worthless

The history of the early rush to the Klondike gold fields in the nineties, of the trials, the hopes and the tragic deaths of the veterans of the "Trail of '98," is all recorded in old figures in the records of the multi-generational department in Ottawa. These records are those of the unfortunates who, as Yukoners' had left leaving property which have since declined to nothing by the depreciation of the gold claims. To the 14 estates recorded, the total amount approximates only \$3,000.

George P. Mackenzie, former gold commissioner of the Yukon, now in charge of exploratory work and Arctic expeditions of the Canadian government, knows most of the "soudroughs" included in the records. Among those he personally recognizes are Old Olson, at one time Dawson City's wealthiest and most influential citizen. His vast real estate holdings, purchased with his profits, deteriorated when the gold craze ceased. His unclaimed fortune has been reduced to \$2,200.

Another famous character was J. McGee, of White Horse, miner, fighter, gambler and horse, said to be the hero of many of Robert W. Service's poems of the Yukon. His fortune has declined to \$200.

The total assets of other famous characters of the "Trail of '98" including Thomas H. Buchanan, Horace Stewart and R. Anderson, have dwindled to mere pignions. They all have died in recent years in the frozen North.

Luminous Night Sticks

For Paris Policemen

Will Make Signals For Traffic Arrest

To See

Paris policemen are to be provided with luminous night sticks or "billy clubs" as they are popularly referred to in America. Many Paris drivers are said to be short sighted and to endanger the lives of traffic and other policemen by being unable to see them any distance away. They especially say they are unable to see the signals or gestures of the traffic policeman at night, and for that reason the luminous stick has been proposed.

Could Use This Comb

Lead some readers to draw their attention to this bit of wisdom from the Klondike. Centers commercial value. "Should your husband object, to the price of your Easter bonnet, just casually remind him of the time he told all her life in the royal household, but is now going into a London flat."

British University For Holy Land

To Mount of Olives it is proposed to the English college, now operating in Jerusalem. This is regarded as a step towards the establishment of a British University in the Holy Land. An expenditure of \$50,000 will be involved.

Advertiser

A customer at a small restaurant, Walter, what the meaning of this? Yesterday you gave me a portion twice as large as this.

Walter—Where did you get your day, sir?

By the window.

Ah, that accounts for it. We always give people by the window larger portions.—The Outlook.

What He Needed

An old colored man was arraigned before a justice on a charge of assault. During the proceedings the judge asked if he wanted a lawyer appointed to defend him.

"No, no, judge," he replied. "I don't want no lawyer. But I s'pecially want a couple of good witnesses, if you won't get 'em."—The Outlook.

Monster Steers

Two seven-foot steers, which weighed the scale at 4200 pounds were recently shipped to the Calgary stockyards by W. J. McIntyre, of Valparaiso, Alberta. They had less than 100 pounds during shipment. Owing to the immense size of the steers difficulty was found in colling them.

Officers Manager

Officers Manager: I saw you at the football game.

Brown: Yes, sir. The dark man sitting next to me was my dentist.

"If you love her why don't you marry her?"

"I wish you'd tell her that."

Duchess of Atholl Arrives

The Duchess of Atholl, parliamentary under-secretary to the British Department of Education, photographed on her arrival at the Canadian Pacific Winter Station to the attendance of the National Council of Education, held in the metropolis week of April 5. Right, above, Miss Morley Fletcher, niece of the Duchess.

Explains How Photos Are Sent By Radio

Investor Tells How Idea Was Worked Out

Captain H. Hanson, of Newark, N.J., head of the Radio Corporation of America's department of research and development of radio, told of his invention which makes possible the sending of photographs, signatures and other original writing across the Atlantic by radio.

The corporation expects to establish such a service on a commercial basis shortly.

Captain Hanson said he received his inspiration for the receiving apparatus by observing a reservoir and seeing in it electrons instead of water. From that he got the idea of storing electrical energy, stirred by light action on photo-electric cells, until it was strong enough to be sent over the radio in dots and dashes. The real problem, he said, was to find a liquid material adaptable for recording the dots and dashes after they were received. He solved it by using paraffin.

Talking Clock Is Latest

Announces Time Every Fifteen Minutes From Photograph Film

Many different kinds of clocks have been invented in recent years. The latest is a clock that talks, announcing the time every fifteen minutes. This speaking timepiece, it is said, differs very little from the ordinary clock. It has the same kind of face and standard works, with the exception that to the minute shaft is fastened an automatic lever and can which is actuated every fifteen minutes by the minute wheel. This lever, in turn, works a second lever which is fastened to a drum carrying a photograph film. This action of the film upon the second starts an electric motor which moves the film to make a clock that talks, announcing the time every fifteen minutes. The clock also has a repeating device.

Saskatchewan Butter Production

Creamery butter production in the province of Saskatchewan during the month of February totaled 722,703 pounds, as against 620,515 pounds a year ago, an increase of 15.18 per cent. The increase of output was general throughout the province, the southern district recording an increase of 12.5 per cent. and the northern district of 18 per cent.

Retort Courteous

Answer For Hostess

A certain young man who is very young and also rather shy was invited to a dinner party given by a woman who is at least fifty, but frivolous enough for society.

At dinner she asked the surgeon to carve a chicken, and not having done so before, he failed miserably.

Instead of trying to cover his confusion, the hostess called attention to it by looking down the table and saying loudly: "Well, you may be a clown, but you're not a fool."

"No," he replied, politely, "but, then, you are not a beauty."

Willing To Be Questioned

Witness Had No Objection To Giving Information

Proceeding counsel asked the witness: "Where were you between 10 and 10:30 on the morning of August 9?"

"I object," said counsel for the defense.

"Let him ask me," the witness said.

The relevancy of the question was argued and finally dropped, but not by the prosecuting counsel. He went not back to the debated question and the defense again objected. Again the witness replied: "Let him ask me. Let him ask me."

The judge then the question arose, the judge stepped into the breach and said that it was material. — Where were you between 10 and 10:30 on the morning of August 9?"

"I don't remember," said the witness.

Shipping the Elephant

Switzerland—"And what was the row about down at the freight yards this morning?"

Truckman—"Sure, now, I was all over a young elephant a circus man wanted to ship to Saint Louis. Murphy said it was murrer clock. I'd claim it should go at trunk rates, and Dugan swore they should bill it as a baby brand."

The best way for a Canadian to feel better about his income tax is to compare it with the British levy.

Bad news and soft boiled eggs should be broken gently.

The Falkland Islands

Very Little Crime and No Unemployment in This Favored Place

Two hundred islands, off the coast of South America, are said to be free from crime for years at a time. Daniel John O'Sullivan, a bluff and hearty Irishman, who has ruled as chief constable and keeper of the prison over this most southern of colonies, landed in England recently to make a brief tour of duty.

He is his first visit to London since seventeen years ago when he accompanied a tourist to this country. The Falkland Islands have everything but a lunatic asylum and a prison for those serving long terms sentences.

Port Stanley, Mr. O'Sullivan's headquarters, was shocked when the crime that has brought the chief constable to England was made known. The Falklands are not fond of crime. Mr. O'Sullivan says: "Unemployment is nil in the Falklands. That is one reason why we have to little crime. There is a solubility in the islands which a larger community could not possibly know. We are not barbarians."

We have very good education, and rich for those who work hard, though sometimes life is lonely. The people are very friendly and there are long rides of horseback before we see a friendly face. Our greatest need is a newspaper of our own."

The Falkland Islands are not fond of crime. Mr. O'Sullivan says: "Unemployment is nil in the Falklands. That is one reason why we have to little crime. There is a solubility in the islands which a larger community could not possibly know. We are not barbarians."

billiards

the game that
makes better citizens

AS a character builder, the game of billiards is unexcelled. It develops self-control, patience and perseverance. And, as an exercise, billiards is ideal—an all-year-round recreation that brings into play practically every muscle of the body.

Visit our billiard room. You will find an atmosphere of refinement and a feeling of cordial fellowship. You also will find the kind of equipment that makes the playing of billiards more enjoyable.

RADIO SERVICE
Grain and Cattle Market prices every day between 1 o'clock and 1.30 p.m.

About Town and Country

Effective May 2, there will be a daily train service from Oyen to Calgary and Saskatoon. The addition of a Sunday train to Saskatoon and a Monday train to Calgary will be appreciated by the travelling public.

Tickets are now on sale for Rev. George A. Dickson's lecture on Friday, May 7. See display posters.

Mr. and Mrs. C. D. McMillan and family, of Rosetown, were Oyen visitors last Sunday. They arrived on the morning train and left in the afternoon train for the new car.

Miss Peggy Monagan, who has been on the Oyen General Hospital staff for the last two years, left that institution last Thursday. She is going to assist Mrs. Walker at the Tessor farm.

Seeding in many of the local districts has been more or less general for the past week. A number of farmers have already completed large acreages.

Charles S. Wright returned to Oyen this morning from Calgary, and will spend a few weeks here. Mr. Wright expects to return to the city some time in June.

NO KNIFE NO DRUGS
Consultations Free
Dr. JAMIESON, CHIROPRACTOR
Oyen, Wednesday and Thursday
Office opposite Church of England

The coming month is a good time to get your property overhauled. There are a number of buildings in town that would be greatly improved by painting. Oyen has always enjoyed the reputation of being a clean and nice looking town. Do your part to keep it so. We believe it is part of good citizenship to keep your property in good repair and nicely painted. Let it be a slogan for the coming month, "Paint every building that requires paint".

In order to compile a schedule of handicaps, all members of the Oyen Golf Club are requested to turn in to the Secretary three cards (9 holes each) on or before May 3. A fine pair of golf shoes is offered to the member turning in the lowest score for the 27 holes. Score cards may be obtained from the secretary, Charles Stewart.

Dr. W. D. McPhail gave a lecture on "Social Hygiene" before the W. I. last Wednesday, which was greatly appreciated.

"Bill" Hogan is making satisfactory progress after his recent operation and will be leaving hospital in a few days.

Mark Swinburn left this morning for Coronation to join the staff of the Bank of Toronto, at that point.

Mr. and Mrs. John D. Hunt and family, left last Thursday morning for Medicine Hat, en route to Perth, Ont., where they are going to make their home. They are making the trip by car.

Mrs. M. D. Oyen, who was admitted to hospital last Saturday is reported to be doing nicely.

Mr. and Mrs. R. E. Wilkenson motored to Calgary last Saturday, returning to Oyen this morning. Miss Peterson, who accompanied them, expects to return shortly.

George Schlosser of Sunnydale, who was in town last Saturday, informed the News, that he had just completed seeding 80 acres. He says the land was in fine shape for work.

Mrs. G. S. Peck, who has been in hospital for the last few days, is reported to be doing well.

LANFINE LOCALS

Mr. W. K. Wilkins, who came to this district in 1909, had a successful sale of farm stock and implements last week. He left the district last Wednesday for Rochester, where he will consult Mayo Brothers.

Mr. Fred McBean of Calgary was in the district a few days ago gathering up his horses.

We are pleased to learn that Walter Caskey is making steady improvement and is now able to go out.

Mr. Garrison left on Wednesday morning for Los Angeles, Cal.

The spring rush is now on. Farmers are busy harrowing and seeding and only come to our hamlet when absolutely necessary. Some of our residents have cleaned their lots, but there are still a few to be done to make our hamlet spot and spae. The grass is making splendid growth and the prairie is beginning to assume an emerald green that is most pleasing to the eye. There are rumors that a base ball and tennis club are to be formed.
